Start Communicating Virtually

Today's economic environment makes it essential to curtail travel costs. At the same time it remains essential to be able to showcase products and services, as well as to collaborate with colleagues.

An Adobe Connect "room" is an essential tool in your arsenal of resources. With an Adobe room from Civicom, you can hold sales meetings, conduct webinars, make presentations, give tours of your website, collaborate on documents, showcase achievements, hold interviews, and review revenue targets and results.

Basically, anything you want to do in person can be done through your Adobe room, in real time. You can upload PowerPoints, or pre-recorded videos, share your desktop to view websites, documents, or spreadsheets, and use whiteboards.

Virtual Meeting Room

Think of your virtual meeting room like a real office conference room. You can conduct one meeting at a time in each individual 'room.' Each 'room' has the capacity for up to 100 Viewers! (More can be accommodated.)

Use your Adobe room for one-on-one presentations, as well as larger meetings. For example: interview candidates online, present to your prospects, or close your sale.

Save Money

Save vast sums of money and stop wasting time travelling in frequently stressful circumstances. Reach more people and accomplish much more in a single day.

Spread your geographic reach from the comfort of your business or home office, using your desktop, personal computer, or Mac. You can even record meetings, and they can be archived for your future reference or sharing with others.

Civicom Assistance

Civicom will work with you to make sure the members of your team understand how to effectively work with the Adobe Connect Pro features. We offer an easy to understand host manual as a back up reference tool.

We can also run events and programs for you. So if you want to concentrate exclusively on your audience, we are able to take care of everything else for you.

Choose Your Plan

Reserve Meeting Space for:

- Unlimited Use on a Monthly Plan
- Individual Meetings
- A Meeting Series

Reliability

Adobe Connect Pro is flash-based, and is therefore the most reliable web presentation technology across multiple operating systems. It is both Mac and PC friendly for both hosts and participants.

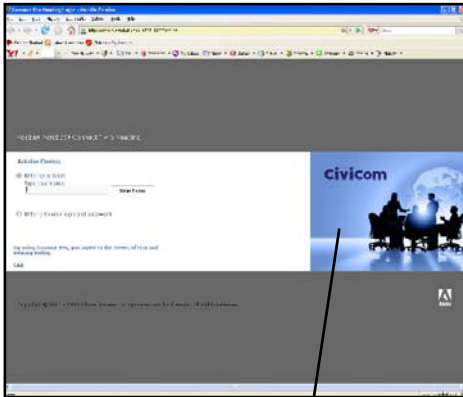

Social Responsibility - Civicom's founders pledged 10% (a "Tithe," or tenth) of their stock to World Vision, a humanitarian and relief organization committed to attacking the root causes of poverty among the world's neediest and most vulnerable.

Features

Civicom has done the research for you through an extensive six month analysis of current online meeting trends and technology available in the market place.

The Welcome Page

To enter your room, all you need to do is paste in your url and sign in. There are no codes to enter and no unnecessary downloads. Its easy for your guests, too. They just enter the same url, and their name, to join your event.

You can brand the welcome page with your company logo, project name, or any art work of your choice. You may also include a welcome message.

Sample Pod Configurations

Guests see only your presentation, and any other pods that you want them to see. There are a wide variety of pod configurations to choose from, allowing you to customize your presentation to meet the specific needs of your event.

Sample 1

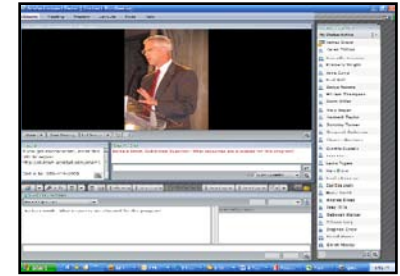

Presentation with webcam, attendee list and chat pod

Sample 2

Two parties discuss a website

Sample 3

Executive presentation with notes pod, attendee list and question and answer pod

Choose the Pods that are Right For Your Event

This picture shows all of the pods available to you. You can move them around, resize them or hide them depending on your needs. As a Host or Presenter, you are in control of the pods that you allow your guests to view. You can also communicate privately with other Hosts or Presenters during your event. Pre-set your desired screen features.

Presentation Flexibility

Adobe Connect Pro is a "Pod" – based system. You use various "pods" to show what you want, such as an attendee list, a chat room, an additional "private" chat room, a polling center, a place for notes, and, of course, your "share" pod, where the material you want to present is featured, either by download or through your desktop.

The webcam pod is an exciting feature that personalizes your virtual experience. You and your audience can be on webcams and see each other during

your virtual event, or just use your own and let others see you. The system can support as many webcam pods as you can fit onto the screen.

You can combine whatever pods you need, and vary them, according to the needs of your particular event.

Webcam Pod

Share your webcam with other meeting attendees.

Attendees List Pod

Discussion Notes Pod

Additional Notes Pod

Chat / Q&A Pod

Private Q&A Pod
